# Terrifying Jabberwock

## Petrifying appearance

This dangerous creature has a strong,muscular body to keep itself safe from predators.The vicious Jabberwock can shred a human's body into pieces like a turkey chicken with its claws.The horrible beast has eyes that can shoot lasers if they are in trouble.Its sharp teeth can bite a humans body in one mouth full.It would lick its lips with blood all over its tongue and teeth.His tail is as strong as a rock so it could smash a person's head off.The petrifying Jabberwock has a fast,ginormous wing that can fly 6,000 km per hour.Its powerful,strong, mouths can swallow a human's head in one gllp.

## Habitat - The mythical fountain

If you think the appearance is terrifying wait until you read this.Do you know that Jabberwock washes his jub jub birds bones in the bloody fountain?It's like a normal fountain but covered in blood stains and blood squirts out of it instead of water. Deep in the heart of the Tulgey woods there's a cave right in front of your eyes. It has bones chewed all over the pathway.The cave is as big as 300 mansims. Everyone calls this the MYSTERIOUS CAVE and many brave people go inside but they never come out.The beast especially it loves its food if someone takes its food for their pet he would kill them and eat them too.As you are walking it would smell like rotten,raw meat leftovers on the bones.

## Diet - The unpleasant Jabberwock

This malicious beast is an omnivore.It eats all kinds of plants and animals. It loves the animals more than plants though.Its favorite food is kids heads and bodys if someone is too foolish to enter the Jabberwocks cave he would eat them immediately. It especially loves to feast on jub jub birds babies when they hatch .It would gobble them all in one go.The Jabberwock keeps on chasing the bandersnatch to get the tail and save it for winter or just eat it.
