The unknown Jabberwock

The Jabberwock’s appearance

This dangerous creature has flaming dragon eyes to spot his prey and it can shoot red,blazing lasers out of his glowing dragon eyes.
The vicious Jaberwolk can fly for 5000miles per an hour with its huge,powerful wings.
The horrible beast can cut a giant in half with its deadly tail.
Its dragon eyes are used for locating enemies from 100 miles and seeing in the dark.
When it's night his eyes glow red.
The mycal beast has scales on the tail that turn into spikes.
The mysterious creature has teeth that can rip someone in half and rip a dragon head of.
The Jabberwolks claws can break a diamond.
The beast has spikes on the neck to put its dead prey on it and munch it for later.
When the animal drews it draws out blood.

The heart of the cave

If you think the appearance is terrifying hear about the habitats. Do you know that the creature's nest is made out of the JubJub Bird bones? Deep in the heart of the forest is a river of blood from the borogoves. The path to the lair is made of human blood and humans body parts. Everyone calls the Jabberwolks lair the hearts of the cave. The beast stores one home for sleeping and the other for homes. On the path are lots of bones from the Bandersnatch. The heart of the cave is located at the tugle woods. Did you know that the heart of the cave is surrounded in blood puddles. While your walking on the path you can smell smoke. When you enter you can hear people screaming.

The bloody diet

This beast is a carnivore so it only can eat meat.
Its favorite food is some huge heart.
It especially likes to feast on the Bandersnatch tail.
The mysius Jabberwolk kept the JubJub bird eggs warm to eat later.
The careless Jabberwock eats the borogove's eyes.
The evil animal eats kids' organs if they are nearby.
