Deadly Jabberwock

Blood thirsty jabberwock

This vicious creature has eyes redder than blood and it can rip human flesh with his bloody claws.His deadly teeth can rip human flesh and his tail neck can swing side to side to hunt for prey. His tail is strong as stone and he can fly 5000 miles per hour

Deadly cave of the Jabberwocky

Do you know about the deadly cave of the Jabberwocky? First of all, if you see blood near the Tulgey woods forest, do not follow it.I am saying this because if you follow it you will end up in Jabberwocky cave and if you go there you would never come out alive.The jabberwock cave has skulls hanging from the ceiling ,organs are scattered on the floor , dead animals are everywhere .The scariest of them all is that the nest is made out of jubjub bones.

The horrendous diet

This blood curdling beast has a horrendous diet he has jub jub bird for breakfast,Borogrove for lunch ,heds for snakes and hearts for dinner. The creche takes jubjub bird eggs and when they hatch he eats like a snack.The terrible Jabber wocks favourite food is baby bander snach.
