The fearsome Jabberwock

The deadly creature

This creature has metal sharp claws that can slice a human in half. You wont believe what it has done! With its scaly burnt tail it has wacked over 1 million people and has refused to stop .this horrible beast has got flaming red eyes that is hotter than a fire .It can laser people and can also cut you in half.this animal has sharp bloody teeth it could rip humans flesh and wouldn't even chew.

The deadly woods

Do you know that in the deadly woods that the Jabberwock has ate over 1000 humans.This beast lives in the deadly woods and has littered bones and skulls on his pathway. There is a cave which is his home. Also there is blue blood bandersnatch and has a nest made out of JubJub birds bones .If you think this appearance is petrifying well listen to this ! when people come in they never come out.

The dangerous diet

This vicious beast is an omnivore. It likes to eat jubjub birds eggs and keeps them warm so when they hatch he can devour it all up.Its favourite food to feast on is especially their organs for his snack .the fearsome jabberwock keeps traps for his lunch which is bander snatchs tail .
