The deadly Jabberwock

Appearance

This dangerous creature has powerful wings. Its wings can fly 600 km per hour. It helps it hunt its prey. The horrible beast has eyes like a demon and it can shoot blazing lazers at its victims . Its tail is hard like stone. The tail can hold its dinner. The vicious Jabberwock can catch its dinner then rip the flesh with its teeth. Its mouth can shoot flaming fireballs at humans. The deadly claws can go deep in a tree and easily take its claws back out of the tree. His back has sharp spikes so if someone sits on one it

HABITAT

If you think appearance is deadly and terrifying but the habitat is woser. The Jabberwocks cave is located at the heart of the Tulgey woods people call the cave the HEAVEN AND DEATH cave peoples organs are EVERYWHERE like brains stomicks heads bones blood. On trees there are scratches. IT has a food cave and a home cave. Be careful you do not know which is which.

Diet

This creature is an omnivore because it eats any thing. Its favourite food is brains. It specially eats humans hearts and animals hearts. The hideous Jabberwock keeps the JubJub birds eggs he keeps them warm so when they hatch the beast will eat them.
